EDUCATION

Miami University - Oxford, Ohio | B.S. Software Engineering, Minor in Deep Learning & AI
Dean's List, Spring 2026

May 2028

WORK EXPERIENCE

Software Engineer Intern | CodeRails.ai

May 2026 - July 2026

- Built pre-prompt secret detection engine covering 40+ credential and PII patterns at sub-50ms p99 latency, blocking sensitive data before it reached LLMs in AI coding workflows.
- Shipped policy-driven file filtering and prompt shielding to production for a zero-integration security agent, letting teams enforce data-handling rules without modifying their existing dev tools.
- Built an evaluation harness with test cases measuring detection precision/recall across pattern categories, reducing false positives by ~15%

Teaching Assistant | Miami University

January 2025 - Present

Object-Oriented Programming, Data Structures & Algorithms, UI/UX Design, Problem Solving & Programming

- Supported four courses spanning the core CS sequence, mentoring 50+ students in Java and Python through structured code reviews and 1:1 debugging sessions.
- Ran weekly lab sessions and grade submissions with detailed written feedback, identifying recurring error patterns and improving assignment pass rates across two class sections.

Building Manager | Armstrong Student Center, Miami University

August 2025 - Present

- Manage operations for 40+ events per semester, supervising 5-10 student employees as primary client contact.

PROJECTS

SkinMap: Skincare Routine Builder | TypeScript, Next.js, React, Supabase

June 2026 - July 2026

- Built a deterministic 6-layer rule engine mapping 27 branching quiz responses to personalized routines across 20 actives, enforcing 13 interaction rules and 6 safety gates.
- Designed an 8-table PostgreSQL schema with 32 row-level security policies and covered the engine with 78 unit tests.

FlixNet: Full-Stack Movie Search Dashboard | JavaScript, PHP, SQLite, Docker

April 2026 - May 2026

- Architected a PHP REST API with a SQLite caching layer to reduce redundant external API calls; containerized with Docker and deployed on OpenStack.
- Built a filterable search history feature backed by local persistence within a 4-week sprint.

Book Portal: Bilingual Book Donation Platform | Figma, InVision

October 2023

- 1st Place, CSYA Hacks 2.0 Ideathon (Top 10 of 47 teams). Designed and prototyped a bilingual platform connecting rural students with textbook donors using ZIP-based search.

TaskMaster: Mobile Productivity App | Figma, Usability Testing

May 2026

- Led UX design across 3 user personas; usability testing cut prototype task completion steps by 30%.

LEADERSHIP & INVOLVEMENT

President | ACM-W, Miami University

August 2024 - Present

- Lead the executive board, organizing 6-7 professional development events and a mentorship program each semester.

Programming Officer | SHPE, Miami University

August 2025 - Present

- Design and coordinate professional and networking events, leading cross-org collaborations to strengthen outreach.

TECHNICAL SKILLS

Languages & Databases: Java, Python, JavaScript, TypeScript, C++, PHP, SQL, HTML/CSS, PostgreSQL, SQLite

Frameworks & Libraries: Next.js, React

Tools & Platforms: Docker, Git/GitHub, Vitest, Figma, OpenStack
